

PRE-ENGINEERED, CONVENTIONAL & HYBRID BUILDING SYSTEMS

NORTH AMERICA'S LEADING
PROVIDER OF COMMERCIAL,
INDUSTRIAL, AND RESIDENTIAL
STEEL BUILDINGS

UNDERSTANDING THE STRENGTH OF YOUR PARTNERSHIP WITH NORSTEEL BUILDINGS

Norsteel was first founded to service Metal Building requirements for large-scale, complex Industrial, Commercial and Warehousing facilities. Throughout the past 20 years, our product scope has evolved to accommodate an exciting array of diverse applications and complexities.

Norsteel works with only the best manufacturers in North America to produce an all-encompassing product line of Pre-Engineered Metal Building solutions. We also offer All-Steel Conventional Buildings and Hybrid Structures when required. Instead of accessing one individual expert, our partners have access to the best of the best, through their relationships with Norsteel.

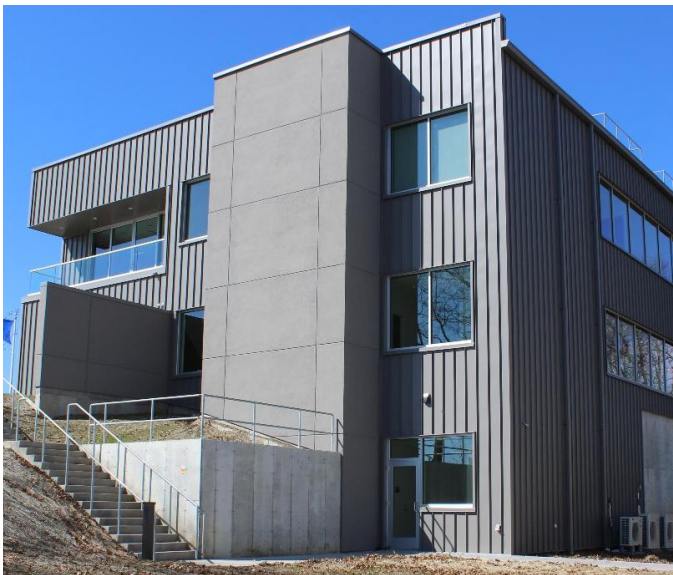

PRE-ENGINEERED, CONVENTIONAL & HYBRID STEEL SOLUTIONS

We will not constrain your architectural creativity

At Norsteel, we leverage a “best-fit approach” to achieve excellence. In this way, we provide the ideal structural solution to suit your specific needs – appropriately, efficiently, and with exacting precision.

Our goal is to create the perfect marriage between our customer’s requirements, the ideal mix of products and services, and the highest possible value.

We offer end-to-end Metal Building Solutions that address a wide range of structural building needs through a diverse selection of products. A key advantage is that we are not limited to one manufacturing process with a single product line. This flexibility lets us design and quote projects across an entire scope of work for our clients.

THE NORSTEEL ADVANTAGE

When you contact Norsteel first, our highly-experienced design team uses advanced engineering software to design your structure in-house – saving you the initial costs associated with high-priced engineers and architectural firms. Our team of experts will work with you to thoroughly understand your project goals and then provide preliminary structural designs that address your specific needs. We ensure you are fully satisfied through our extensive product offerings and advanced consulting expertise.

NORSTEEL METAL BUILDING SYSTEMS: THE PERFECT SOLUTION

When Norsteel is engaged at the idea stage of the building design process, we take full responsibility for the initial engineering, saving you time and money. Our extensive manufacturing network also provides faster delivery times. With a multitude of plants at our disposal, Norsteel can meet delivery demands, even during the busiest construction times.

Finally, the ability to act as Project Management for our customers is well-known. From the start, you will work hand-in-hand with our management team to ensure all requirements for design, products, and timelines, are met without issue. After the design phase, we will continue working with the general contractor, to ensure that all building needs are met – providing guidance bolt locations and building reactions during the foundation phases, and then ongoing support while the building is being erected.

THE NORSTEEL ADVANTAGE

REDUCED COST

Our highly experienced design team and advanced engineering software, allows us to design your structure in-house saving you the expenses associated with high-priced engineers and architectural firms. Also, pre-engineered materials make it easier and faster to assemble our buildings; this reduces the time needed and labour costs during construction. Lower maintenance expenses provide additional value

DESIGN CUSTOMIZATION

Our team of engineering experts help you design the building you want – meeting all your requirements with our extensive product offerings. Depending on the location, you can also expand your structure over time.

PEACE OF MIND

You can rest easy knowing that Norsteel buildings are safe and secure, providing superior and long-lasting protection

SUSTAINABILITY

The steel used in Norsteel buildings is nearly 100% recyclable; this makes it cost-effective and leads to less reliance on valuable natural resources
