

STORAGE UNITS

NORTH AMERICA'S LEADING PROVIDER
OF COMMERCIAL, INDUSTRIAL, AND
RESIDENTIAL STEEL BUILDINGS

NORSTEEL *PREFABRICATED* BUILDINGS ARE IDEAL FOR STORAGE UNITS

Norsteel has been built on a foundation of honesty and integrity. Over the years we have established ourselves as North America's leading supplier of award-winning, pre-engineered steel buildings. Our structures are designed, engineered, and fabricated in state-of-the-art manufacturing plants, which means we can deliver your finished product weeks faster than most others. All of our products are long-lasting, durable, and backed by industry-leading warranties.

The self-storage industry in North America has annual revenues of over \$37 billion and continues to grow at over 7% every year. This growth rate means that fast build times for storage buildings are in high demand. These buildings are responsible for keeping your valuable possessions safe, which makes durability and enhanced fire resistance a priority. Security and climate-controlled environments add an extra layer of protection, giving you peace of mind that your belongings will be held secure for as long as you need to keep them in storage.

STEEL STORAGE UNITS

Steel is the perfect fit for use in the construction of self-storage buildings. It provides climate control, physical security, and options to design your facility to best suit your needs. The flexibility provided by steel means you can create the perfect building for your business operations. It also allows you to easily expand as your business grows, making sure you can offer your customers the best in personal storage.

The durability of steel will ensure that the building will not weather over time, keeping its contents secure throughout even the harshest conditions. With minimal maintenance, your steel storage building will remain looking great and protecting the valuable possessions of your customers for decades to come.

NORSTEEL METAL BUILDING SYSTEMS: THE PERFECT SOLUTION

A Norsteel building is the ideal choice for today's self-storage units, offering clear advantages over other common materials such as wood and masonry. We will work with you throughout the process from concept to construction, making sure that we provide you with the perfect building. The flexibility of our pre-engineered materials saves you time in the construction process, letting you get to market faster and keep up with demand.

THE NORSTEEL ADVANTAGE

REDUCED COST

Our pre-engineered materials make it easier and faster to assemble our buildings; this reduces the time needed and labour costs during construction. Lower maintenance expenses provide additional value

DESIGN CUSTOMIZATION

Our team of engineering experts help you design the building you want. Depending on the location, you can also expand or alter the structure over time.

SUSTAINABILITY

The steel used in Norsteel buildings is nearly 100% recyclable; this makes it cost-effective and leads to less reliance on valuable natural resources

PEACE OF MIND

You can rest easy knowing that Norsteel buildings are safe and secure, providing superior and long-lasting protection

NORSTEEL BUILDINGS
