

***EASYBUILD* STEEL BUILDING KITS**

NORTH AMERICA'S LEADING PROVIDER OF COMMERCIAL, INDUSTRIAL, AND RESIDENTIAL STEEL BUILDINGS

NORSTEEL'S *EASYBUILD* STEEL BUILDING KITS: THE ONE TRUE DO-IT-YOURSELF METAL BUILDING SOLUTION

Norsteel has been built on a foundation of honesty and integrity. Over the years we have established ourselves as North America's leading supplier of award-winning, pre-engineered steel buildings. Our structures are designed, engineered, and fabricated in state-of-the-art manufacturing plants, which means we can deliver your finished product weeks faster than most others. All of our products are long-lasting, durable, and backed by industry-leading warranties.

Steel building kits are the ideal choice for the 'do-it-yourself' lifestyle. From the ground up, the framing, wall and roof panels, trim, and other components work together to provide you with a high quality, durable steel building. When used to store personal belongings, safety is a paramount concern. With many hobbyists treating these spaces as a home away from home, they must be comfortable and durable for extended use.

Norsteel's EasyBuild steel building kit provides you with an affordable solution to create a custom-designed space that is comfortable, safe, and sturdy. Instead of heavy welded beams, the EasyBuild is made from lightweight, high performance, bolt-together components that do not require a crane, heavy equipment, or special tools to construct.

EASYBUILD KITS: WHAT'S INSIDE

Framing System: *EasyBuild* structures have a hot-dip galvanized steel frame to prevent rust and maximize performance. All primary and secondary framing components are zinc coated and outperform inferior paint primers.

Sidewall Panels: Our standard sidewall panels are 26-gauge steel and are continuous from floor to eave. Panels are available in twelve popular colour options, and the paint we use has a siliconized polyester finish with a substrate galvanized coating beneath the paint for further rust protection. Optional panel accessories are available, including service doors, fixed or operable wall louvers, and framed openings for windows and garage doors.

Roof Panels: Our roof panels are 26-gauge high-tensile steel with a corrugation depth of 1-1/4" and are coated in AZ55 Galvalume® - an aluminum/zinc coating which protects the roof sheeting against rust. The AZ55 coating requires no maintenance or painting to retain its original luster. The Purlin Bearing Rib (PBR) roof system provides a full overlap, which means our buildings are weather-tight even under extreme conditions.

Trim Package: J trim, base trim and cover material are included with your building at no additional cost. These provide added protection from leaks and further security while enhancing both the functionality and beauty of your building.

THE NORSTEEL ADVANTAGE

REDUCED COST

Our pre-engineered materials make it easier and faster to assemble our buildings; this reduces the time needed and labour costs during construction. Lower maintenance expenses provide additional value. The DIY capabilities of the EasyBuild further increase its affordability.

DESIGN CUSTOMIZATION

Our team of engineering experts help you design the building you want.

SUSTAINABILITY

The steel used in Norsteel buildings is nearly 100% recyclable; this makes it cost-effective and leads to less reliance on valuable natural resources.

PEACE OF MIND

You can rest easy knowing that Norsteel buildings are safe and secure, providing superior and long-lasting protection.

NORSTEEL BUILDINGS

Call Norsteel Buildings today. Our dedicated Building Specialists will work with you to understand your specific needs and to design a custom steel structure that best addresses your exact requirements.
