

WAREHOUSES

NORTH AMERICA'S LEADING PROVIDER
OF COMMERCIAL, INDUSTRIAL, AND
RESIDENTIAL STEEL BUILDINGS

NORSTEEL *PREFABRICATED* BUILDINGS ARE IDEAL FOR WAREHOUSES

Norsteel has been built on a foundation of honesty and integrity. Over the years we have established ourselves as North America's leading supplier of award-winning, pre-engineered steel buildings. Our structures are designed, engineered, and fabricated in state-of-the-art manufacturing plants, which means we can deliver your finished product weeks faster than most others. All of our products are long-lasting, durable, and backed by industry-leading warranties.

Countless industries including manufacturing, shipping, and retail depend on the presence of a dedicated storage space. They need to be large enough to store equipment and product inventories, and durable enough to protect their contents from harsh weather conditions over time. Warehouses can have varied layouts depending on the individual needs of the company and require flexibility in their construction. They need to have a climate-controlled environment to ensure proper preservation of inventories that are stored there.

STEEL WAREHOUSES

Steel is the perfect fit for the construction of a warehouse that will last for decades to come. Thanks to its high-tensile strength, steel warehouses are durable enough to handle even the harshest weather conditions. It provides climate control, physical security, and options to design your warehouse to best suit your needs. The flexibility of steel also makes expanding your warehouse easy as your company needs change over time.

Steel buildings are cost effective and can save your company money over time. Their durability means they will require less maintenance than buildings made with other materials. They are also energy efficient, which will help you to run a green business and meet environmental standards.

NORSTEEL METAL BUILDING SYSTEMS: THE PERFECT SOLUTION

Steel allows you to customize your warehouse to fit the specific needs of your business. You can easily add elements to the building including windows, bay doors, and administrative offices.

A Norsteel building is the ideal choice for today's warehouses, offering clear advantages over other common materials such as wood and masonry. The flexibility of our pre-engineered materials will save time and make sure that the space is customized to meet your specific needs.

THE NORSTEEL ADVANTAGE

REDUCED COST

Our pre-engineered materials make it easier and faster to assemble our buildings; this reduces the time needed and labour costs during construction. Lower maintenance expenses provide additional value

DESIGN CUSTOMIZATION

Our team of engineering experts help you design the building you want. Depending on the location, you can also expand or alter the structure over time.

SUSTAINABILITY

The steel used in Norsteel buildings is nearly 100% recyclable; this makes it cost-effective and leads to less reliance on valuable natural resources

PEACE OF MIND

You can rest easy knowing that Norsteel buildings are safe and secure, providing superior and long-lasting protection

NORSTEEL BUILDINGS

Call Norsteel Buildings today. Our dedicated Building Specialists will work with you to understand your specific needs and to design a custom steel structure that best addresses your exact requirements.
